Key Insights & Recommendations

Key Findings

- 1. Students with higher sleep scores reported higher productivity levels.
- 2. Excessive screen time was associated with lower productivity.
- 3. Attendance showed a positive relationship with CGPA.
- 4. Higher productivity scores were associated with stronger academic performance.
- 5. High stress levels correlated with lower productivity and CGPA.

Key Recommendations

- 1. Encourage healthy sleep schedules through awareness programs.
- 2. Promote digital wellness and reduce unnecessary screen time.
- 3. Conduct workshops on study planning and time management.
- 4. Provide stress management and mental wellness support.
- 5. Improve student engagement to maintain attendance levels.
